

Good morning. On estimated June 11th / 2024 I had my life saved very close to D.K.A at the KGH E.R in the City. As some may be aware DKA is life threatening sugar levels above a specific number where you need high levels of insulin administered very fast. Some people require 7 units of insulin, where in an emergency the hospital needs to give you 70 units of insulin which you cannot administer yourself if you ate way too many cakes or cookies not listening to healthy eating guidelines such as anybody who has a dietitian has had provided. Anyhow, while I was waiting for the nurse to put an I.V. in my arm out in the waiting room the power went out for 7 seconds. The hospital was then without power. In less than 1 min the backup restores their power failure. This is a scary place to have a power outage in due to all the life supporting equipment that may not have batteries in them. My MSG for you today is heavenly is always listening and watching over your actions and words. Much like the power outlet in the wall, God doesn't have a close to perfect uptime. There is no 99.9 % perfect success rate with heavenly father. His uptime is met at 100% in everyone's trials and tribulations. If anyone want a copy of this transcript in Realtime as I may edit in Microsoft word 365 - please feel wonderfully free and allowed to reach out to my Lyons street apartment with any contact method listed in any directory whether public or private with love. I say and publish these written words as my testimony of today humbly in the name of Jesus Christ. Amen.
